

Provent[®] Nasal Cannula

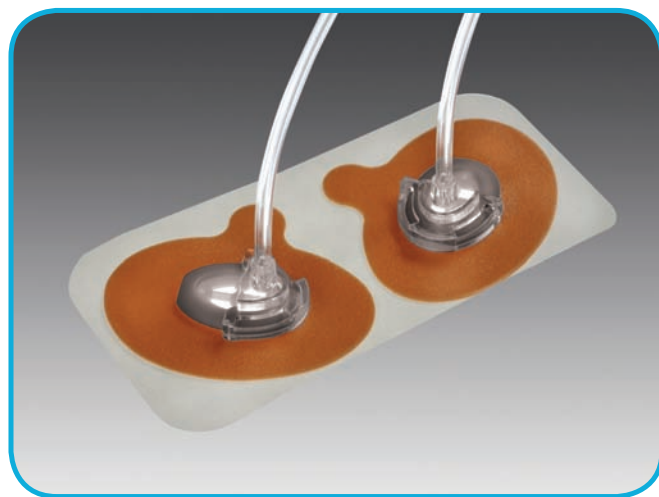

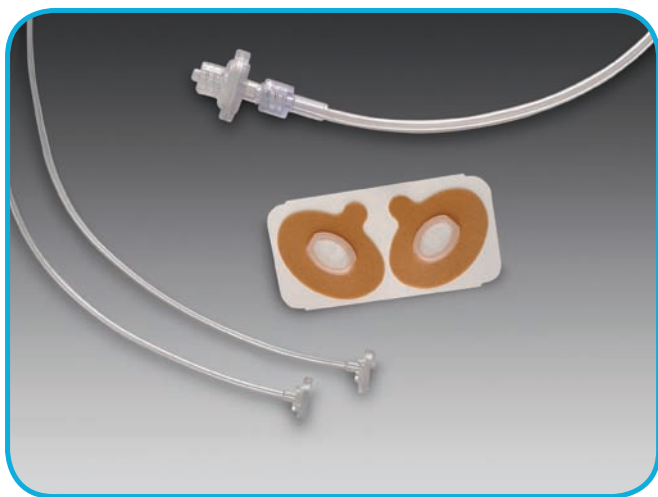

The **Provent Nasal Cannula** is a diagnostic tool to be used with the Provent Sleep Apnea Therapy device during sleep studies, or polysomnograms (PSGs), enabling practitioners to confirm product efficacy.

The **Provent Nasal Cannula** allows transmission of pressure signals from the nose to a pressure transducer of a physiologic recorder with the following:

- > A standard interface designed to attach the nasal cannula to standard pressure transducers, and
- > A custom connection to the Provent Therapy device.

This custom designed cannula is:

- > Simple to set up - connect and apply
- > Disposable
- > Easy to use - turn key kit

The **Provent Nasal Cannula** is indicated for the transmission of respiratory airflow signals between the Provent Sleep Apnea Therapy device and the pressure transducers used with physiologic recorders during sleep studies.

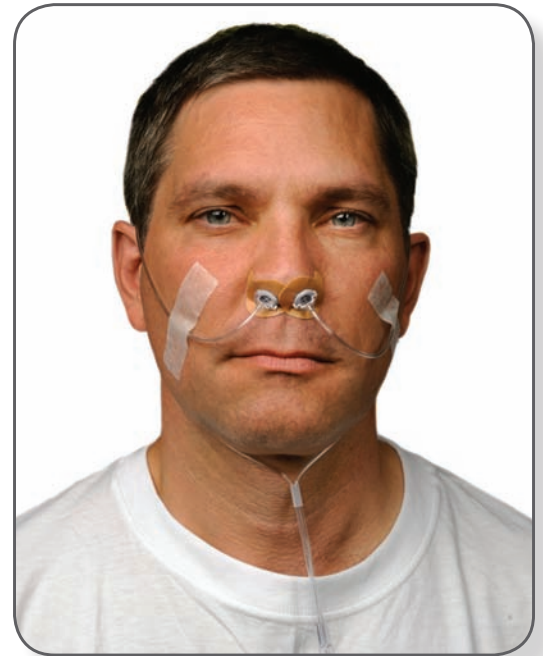

SPECIFICATIONS

Description: Provent Nasal Cannula Diagnostic Kit

Length: 7' (2.2 m) tube with filter

Single Use

Packaged with 1 night supply of Provent Therapy
